Subject: THE BOC PARKING LOT LEASE
7700 14th Ave. South, Seattle, WA

Dear Pat:

Boeing has reviewed your request to grant an easement in place of the current quick claim deed between Boeing and BOC (formerly Air Reduction Co.) for the surface water drainage being distributed from the sump pump in the BOC parking lot through Boeing waste lines. I learned that this storm water from BOC's sump pump has been passing through a metered sanitary line that is charged to Boeing . And now the City of Seattle is demanding that all storm water be diverted from sanitary lines because it impacts their capacity to handle that waste water. Therefore it will be a new owner's responsibility to connect this sump pump discharge to the City of Seattle's storm water lines and get it off Boeing's metered sanitary line.

Sincerely,

A handwritten signature in cursive script, reading 'Robbin Bushnell', with a long horizontal flourish extending to the right.
